Widening of SH-83 Km. to 23.4 lane of Etawah –Mainpuri Road.

The proposal was discussed SAG on 12.07.2013. In the SAG meeting the concerned DFOs were not present. The proposal is for Etawah and Mainpuri Districts but the proposal for the Mainpuri district has not been submitted with the proposal. Since the proposal is incomplete the proposal is not being considered in SAG. The Nodal Officer has informed that they have received the proposal for Mainpuri district which will be submitted soon. The proposal is deferred for next SAG meeting.

Four laning widening of SH-77 Km. 54.913 to 60.883 and felling of 1544 trees.

The proposal was discussed SAG on 12.07.2013. on the scrutiny of the proposal it is found that the area calculation has not been done properly and required ROW has not been shown in the proposal the exact area requirement considering the total width required for widening of road which includes central verge blakend road , pavement, drainage service road and area for plantation should have been worked out which is not been given in the proposal. The SAG desired that complete information giving in the cross section of the road as well as change wise area calculation should be submitted for consideration of the proposal by the SAG. The proposal is deferred for next SAG meeting.

The proposal was discussed in SAG on 12.07.2013. The total forest land involved is 16.9712 ha which includes 15.1412 RF and 1.8288 ha of PF. The proposed T/L is mainly through the non forest area where about 1043.2 ha is involved. The total length in forest is 2.65175 Km with ROW 64 meters. Total tree felling involved is 428. The tree felling is necessitated only for construction of tower. CA is proposed in degraded forest land. However SAG desires that power grid corporation should make efforts for providing non forest land as the forest cover in U.P. is about 8% only. It was informed that the efforts have been made by the Power Grid Corp. to provide non forest land for CA but since the non forest land is not available DDFL is proposed for CA. The representative of power grid have informed that since the proposed T/L is very important for grid connection, the CA may be considered in degraded forest land this time. In future he assured that efforts will be made to provide non forest land for CA for diversion of forest land for transmission line. The PF is mainly where the T.L is crossing road railway line and canal. The area is not part of any wildlife sanctuary or national park other information are furnished with the proposal the SAG after deliberation agrees to recommend the proposal for approval.

Widening of Sitarganj - Bareilly Road (NH-74 (30) by NHAI

The proposal was discussed in SAG on 12.07.2013. The total forest land involved is 31.53 ha of PF which is under the control of NHAI. The proposed NH-74 starts from Udham Singh Nagar in Uttarakhand and which runs about 7 Km in Uttarakhand for which the proposal has been submitted to the Nodal Officer, Uttarakhand. The proposal under reference is from district Pilibhit in Amarya village and is up to near Rithora village connecting with NH-24. The total length of the road in U.P. is 67.1 Km. The proposed road is for widening for two lanes with pave shoulder and for the purpose of widening in urban area both the side have been taken up for widening whereas for the remaining countryside only eccentric widening is proposed i.e. at one side of the road only. The major portion for eccentric widening is on left land side in 47.8 Km. and concentric widening is confined to 13.85 Km. since in major portion eccentric widening at left hand side is proposed on the left hand side area for plantation is reduced to only for one line strip plantation. To compensate this loss of strip plantation the NHAI has agreed for CA in double degraded forest land the scheme and map for Pilibhit and Bareilly districts have been submitted with the proposal. Otherwise also wherever space is available strip plantation will be taken up. The NHAI will demarcate the protected forest area with the boundary pillar and for plantation purpose as well as for distribution of seedling the NHAI also provide fund for two nurseries of one lakh capacity each. The area is not part of any wildlife sanctuary or national park all information is furnished the SAG after deliberation agrees to recommend the proposal for approval.
